

## HIGH PERFORMANCE SLURRY PUMPS

*The new range of Super 3000, 3500 and 4500 high performance Slurry Pumps have even more mixing power, increased reliability and less maintenance.*

### **Super 3000 Slurry Pump**

The new range of 3000 series pumps include many new features and offer exceptional value for money - It is reputed to be the most efficient pump on the market.

- ◆ All Super 3000 and 4500 Mobile Models have Quick Attach 2 point linkage - Standard toplink not required. All 3500 mobile models have quick attach and require a toplink.
- ◆ Mobile pumps can be transported from tank to tank without removing PTO Shaft.
- ◆ Heavy duty lifting frame and arms.
- ◆ All mobile models have double acting ram to maximise manoeuvrability and mixing performance.
- ◆ Jetting accuracy further increased with mixing spout fully lockable in 26 positions.
- ◆ Mixing spout revolves through a wide arc allowing slurry to be mixed in any direction including underneath the tractor.
- ◆ In and out of tank is totally controlled from the tractor seat.
- ◆ Modified and updated drive lines ensure increased performance and reliability with the elimination of top bearing on standard models further reducing routine maintenance.
- ◆ Due to the unique design of the new 3000, 3500 and 4500 series pump the same massive pressure and volume of slurry is maintained when jetting or pumping upwards to a top fill tank.
- ◆ Unrivalled when pumping and jetting to above ground store.

#### **Models include:**

- ◆ The Super 3000 Mobile
- ◆ The Super 3000 Static

#### **Options:**

- ◆ Galvanised models on request
- ◆ Models depth range from 1.4m - 6m

**WHERE QUALITY COMES FIRST!**

**MORE MIXING POWER, LESS MAINTENANCE!**

# SUPER 3500 SLURRY PUMP

The NC Super 3500 is designed to meet the needs of the large farmer and the medium size contractor where a 110 to 130HP tractor is available for the slurry mixing task.

With this in mind the robust pump housing has been manufactured and strengthened to stand stresses and strains way beyond those induced by fast efficient mixing.

**3500 MODEL HAS QUICK ATTACH AND HYDRAULIC TOPLINK AS STANDARD**

*Models include:*

- ◆ The Super 3500 Mobile
- ◆ The Super 3500 Static

*Options:*

- ◆ Galvanised models on request
- ◆ Models depth include:  
2m; 2.25m; 2.5m

The 3500 model incorporates some of the features of the famous 3000 such as revolving mixing spout, capable of mixing in all directions and fully lockable in 26 positions. It also comes with a unique mixing spout height adjustment, enabling high and low level mixing from the tractor seat.

## SUPER 4500 SLURRY PUMP

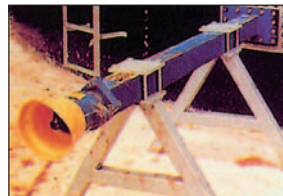

The Super 4500 is a 150mm (6") pump and has a mighty capacity: fitted with Quick Attach and only two point linkage makes it the most efficient manoeuvrable, high capacity pump available.

It incorporates many of the outstanding features of the 3000 model such as: unrivalled manoeuvrability; ease of operation; total operator safety as frame sits on top of slots covering open manhole at all times; slurry jetting height adjustable from the tractor seat.

**Jetter for above ground store**

**Side Stirrer for above ground store**

<i>Model</i>	<i>Tractor HP</i>	<i>Capacity</i>
Super 3000	from 80 HP	13,500 litres per minute
Super 3500	from 100 HP	15,750 litres per minute
Super 4500	from 150 HP	20,250 litres per minute
